

COLLEGE BEAMER PRESENTATION THEMES

USING L^AT_EX TO PREPARE SLIDES

Created 6 July 2026

This template is a secondary creation of the **SINTEF Presentation** template.
Following is a brief introduction to using $\text{\LaTeX}$ and beamer to prepare slides.
This template is released under **Creative Commons CC BY 4.0** license.

Beamer for SINTEF slides

1 Introduction

- We assume you can use $\text{\LaTeX}$; if you cannot, [you can learn it here](#)
- Beamer is one of the most popular and powerful document classes for presentations in $\text{\LaTeX}$
- Beamer also has a detailed [user manual](#)
- Here we present only the most basic features to get you up to speed

Beamer vs. PowerPoint

1 Introduction

Compared to PowerPoint, using $\text{\LaTeX}$ is better because:

- It is not What-You-See-Is-What-You-Get, but What-You-*Mean*-Is-What-You-Get: you write the content, the computer does the typesetting
- Produces a pdf: no problems with fonts, formulas, or program versions
- Easier to keep consistent style, fonts, highlighting, etc.
- Math typesetting in $\text{\TeX}$ is the best:

$$\hbar \frac{\partial}{\partial t} \Psi(\mathbf{r}, t) = -\frac{\hbar^2}{2m} \nabla^2 \Psi(\mathbf{r}, t) + V(\mathbf{r}) \Psi(\mathbf{r}, t)$$

Selecting the Class

2 Editing

After the last update to the graphic profile, the `sintef` theme for Beamer has been updated into a full-fledged class. To start working with `sintefbeamer`, start a $\text{\LaTeX}$ document with the preamble:

Minimum Beamer Document

```
1 \documentclass{beamer}
2 \begin{document}
3 \begin{frame}{Hello, world!}
4 \end{frame}
5 \end{document}
```

Title page

2 Editing

To set a typical title page, you call some commands in the preamble:

The Commands for the Title Page

- 1 `\title{Sample Title}`
- 2 `\subtitle{Sample subtitle}`
- 3 `\author{First Author, Second Author}`
- 4 `\date{Defaults to today's}`

You can then write out the title page with `\maketitle`. You can set a different background image by changing the background path before calling `\maketitle`.

Writing a Simple Slide

It's really easy!

- A typical slide has bulleted lists

Writing a Simple Slide

It's really easy!

- A typical slide has bulleted lists
- These can be uncovered in sequence

Writing a Simple Slide

It's really easy!

- A typical slide has bulleted lists
- These can be uncovered in sequence

Code for a Page with an Itemised List

```
1 \begin{frame}
2   \frametitle{Writing a Simple Slide}
3   \framesubtitle{It's really easy!}
4   \begin{itemize}[<+>-]
5     \item A typical slide has bulleted lists
6     \item These can be uncovered in sequence
7   \end{itemize}
8 \end{frame}
```

Adding images

2 Editing

Adding images works like in normal L^AT_EX:

Code for Adding Images

```
1 \usepackage{graphicx}  
2 \includegraphics[width=\textwidth]{gallery/img.jpg}
```

Splitting in Columns

2 Editing

Splitting the page is easy and common; typically, one side has a picture and the other text:

This is the first column

And this the second

Column Code

```
1 \begin{columns}
2   \begin{column}{0.6\textwidth}
3     This is the first column
4   \end{column}
5   \begin{column}{0.3\textwidth}
6     And this the second
7   \end{column}
8   % There could be more!
9 \end{columns}
```

Fonts

2 Editing

- Fonts should be readable.
- There are good ones:
 - Serif fonts only with high-definition projectors
 - Sans-serif fonts are usually safer
- There are also not so good ones:
 - Avoid monospace for normal text
 - Avoid gothic, calligraphic or weird fonts

Look

2 Editing

- Theme color options are concentrated in the style file; this UCAS version uses **#174994**.
- The theme keeps a light normal page and dark section/backmatter pages, following the visual rhythm of the reference demo.
- To insert a final slide, use the provided `\QApage` command.
- The aspect ratio is set by Beamer; this demo uses `aspectratio=169`.

3 Summary

- ▶ Introduction
- ▶ Editing
- ▶ Summary

Good Luck!

3 Summary

- Enough for an introduction! You should know enough by now
- Adapt the examples to suit your own presentation
